<TBD>	Head of Talent Acquisition	Human Resources	Pending Review
<TBD>	IT / Engineering Lead	Information Technology	Pending Review
<TBD>	System Admin / HR Ops Lead	Human Resources	Pending Review

1. Introduction

1.1 Purpose of the Document

This Business Requirements Document (BRD) defines the business and functional requirements for the proposed Candidate Sourcing System. It captures the needs of Talent Acquisition and HR Operations stakeholders for a platform that allows the organization to create and publish job requisitions, allows external candidates to discover and apply for open positions without needing to log in until they choose to apply, captures structured candidate information and a mandatory resume, and gives the System Admin a consolidated view of all applications received against each requisition.

This document is intended to be reviewed and signed off by business and technology stakeholders before functional design and development begin. It also includes indicative page mock-ups (wireframes) to align on the intended user experience.

1.2 Project Background

The organization currently lacks a unified, self-service system to publish job openings externally and manage inbound applications. Job postings and candidate resumes are handled through disparate channels (email, job boards, spreadsheets), leading to delays, duplicate effort, and poor visibility for both recruiters and candidates. The Candidate Sourcing System is proposed to centralize requisition creation, public job posting, candidate self-application, and admin-side application tracking in a single platform.

1.3 Scope

In Scope

- Creation, editing, and publishing of job requisitions by authorized internal users (System Admin / Recruiter).
- Public, unauthenticated career site where anyone can browse and view posted job requisitions.
- ‘Apply’ and ‘Share’ actions on each job posting.
- Mandatory candidate login/registration prior to submitting an application (browsing remains anonymous).
- A guided, multi-step candidate application flow capturing Bio-Data, Education, and Work Experience.
- Mandatory resume upload as part of the application.
- Automated notification to the System Admin when a new application is submitted.
- Admin grid view listing all applications/resumes received, filterable per job posting.
- Basic application status tracking (e.g., New, Reviewed, Shortlisted, Rejected).

Out of Scope (Phase 1)

- Resume parsing / AI-based candidate-job matching or scoring.
- Interview scheduling, offer management, and onboarding workflows.
- Integration with external job boards (e.g., LinkedIn, Naukri, Indeed) for cross-posting.
- Background verification and assessment/testing integrations.
- Mobile native applications (system will be responsive web only in Phase 1).
- Multi-language / localization support.

Note: Items listed as out of scope may be considered for subsequent phases and should be validated with stakeholders during backlog prioritization.

2. Business Objectives

The Candidate Sourcing System is expected to deliver the following business outcomes:

- Reduce time-to-post by giving recruiters a self-service tool to create and publish job requisitions without IT/webmaster dependency.
- Increase the volume and quality of inbound applications by making job postings publicly discoverable without requiring candidates to register up front.
- Improve candidate experience through a simple, guided application flow and easy ‘Share’ capability for referrals.
- Give the System Admin a single, consolidated grid to review all applications and resumes received per requisition, eliminating manual resume collation from email/spreadsheets.
- Ensure timely follow-up by notifying the System Admin automatically as soon as a new application is submitted.
- Establish a foundation (structured candidate data, resume repository) for future enhancements such as resume parsing and analytics.

3. Stakeholders

Stakeholder	Role / Interest
System Admin / Recruiter	Creates and publishes job requisitions; reviews applications and resumes; manages application status; primary internal user of the admin console.
Hiring Manager	Defines requisition requirements; may view shortlisted candidates (future phase); consulted during requisition creation.
External Candidate	Browses public job postings, applies to jobs, uploads resume, tracks own application status.
HR Operations Lead	Owens the end-to-end hiring process; sponsors the initiative; approves business requirements.
IT / Engineering Team	Designs, builds, and maintains the platform; owns technical architecture, security, and hosting.
Data Privacy / Compliance Officer	Ensures candidate data collection and storage complies with applicable data protection regulations.

4. Assumptions, Constraints & Dependencies

4.1 Assumptions

- Job requisitions are created and approved internally before publishing; requisition approval workflow (if any) is handled outside this system in Phase 1.
- Candidates apply as individuals; there is no agency/recruiter bulk-upload capability in Phase 1.
- A single resume file is required per application; multiple attachments (e.g., portfolio, cover letter) are optional enhancements.
- Email is available and reliable as the primary channel for system notifications.
- The organization has a public-facing domain/URL available for hosting the career site.

4.2 Constraints

- The public job listing and job detail pages must be accessible without authentication.
- The application form (Apply flow) must enforce login/registration before any application data is accepted.
- Resume upload is mandatory; the system must not allow submission without an attached resume.
- Phase 1 is web-based only; no native mobile app.

4.3 Dependencies

- Availability of an SMTP/email service or transactional email provider for notifications.
- Availability of secure file storage for resumes (e.g., cloud object storage) with defined retention policy.
- Organizational branding assets (logo, color palette) for the public career site.
- Legal/compliance sign-off on the candidate consent and privacy statement shown at registration.

5. User Journey

Admin: Login → Create Requisition → Validate → Publish → Monitor Applications → Open Application Grid → Review Candidate / Resume.

Candidate: Public Careers Page → Job Detail → Apply → Create/Login → Bio → Education → Experience → Resume → Review & Submit → Confirmation.

Share path: Job Detail → Share → copy link / supported social or messaging share targets.

6. User Roles & Personas

Role	Description	Key Permissions
Anonymous Visitor	Any external visitor browsing the public career site without an account.	View published job requisitions; search/filter jobs; view job details; use Share; cannot apply.
Candidate (Registered)	External job seeker who has created an account or logged in.	Everything an Anonymous Visitor can do, plus: submit applications, upload resume, view own application history/status.
System Admin	Internal HR/Recruiter user who manages requisitions and applications.	Create/edit/publish/close job requisitions; view all applications and resumes in the grid; update application status; receive notifications.
System (Automated)	Background processes.	Sends notifications to System Admin on new submissions; sends confirmation to candidate on successful submission.

6. Functional Requirements

Requirements below are grouped by functional module. Priority: M = Must Have, S = Should Have, C = Could Have (MoSCoW).

6.1 Job Requisition Management (System Admin)

Req ID	Requirement	Description / Notes	Priority
FR-JR-01	Create job requisition	Admin can create a new requisition capturing: Job Title, Requisition ID (auto-generated), Department, Location, Employment Type, Experience Range, Number of Openings, Hiring Manager, and Job Description (responsibilities, requirements).	M
FR-JR-02	Save as draft	Admin can save an incomplete requisition as a draft without publishing it to the public site.	M
FR-JR-03	Publish requisition	Admin can publish a requisition, making it immediately visible on the public career site without requiring candidate login.	M
FR-JR-04	Edit requisition	Admin can edit an existing requisition (draft or published); changes to a published requisition reflect on the public site.	M
FR-JR-05	Close / unpublish requisition	Admin can close a requisition once filled or cancelled; closed requisitions are removed from public listing but retained with historical applications.	M
FR-JR-06	Requisition list view	Admin can view a list of all requisitions with status (Draft, Published, Closed) and application counts.	M
FR-JR-07	Duplicate requisition	Admin can clone an existing requisition as a starting point for a similar opening.	C

6.2 Public Job Posting & Discovery (No Login Required)

Req ID	Requirement	Description / Notes	Priority
FR-PUB-01	Public job listing page	Any visitor, without logging in, can view a list/grid of all currently published job requisitions.	M
FR-PUB-02	Job search & filters	Visitors can search by keyword/title and filter by department, location, and experience level.	S

Req ID	Requirement	Description / Notes	Priority
FR-PUB-03	Job detail page	Visitors can click a job card to view the full job description, requirements, and job overview (department, location, type, experience, openings) without logging in.	M
FR-PUB-04	Apply button	Each job listing/detail page displays an 'Apply' button. Clicking Apply while not logged in redirects the candidate to Login/Registration before showing the application form.	M
FR-PUB-05	Share button	Each job listing/detail page displays a 'Share' button that generates/copies a public shareable link (and optionally native share sheet / social share options) to the job detail page. Share does not require login.	M

6.3 Candidate Registration & Login

Req ID	Requirement	Description / Notes	Priority
FR-AUTH-01	Mandatory login before apply	The system must require the candidate to be logged in before the application form is displayed or any application data is accepted. Browsing remains anonymous.	M
FR-AUTH-02	Candidate self-registration	A new candidate can create an account using email and password (name, email, mobile, password as minimum fields).	M
FR-AUTH-03	Candidate login	A returning candidate can log in with registered email/username and password.	M
FR-AUTH-04	Social login (optional)	Candidates may optionally register/login using Google or LinkedIn accounts.	C
FR-AUTH-05	Forgot password	Candidates can reset a forgotten password via an emailed reset link.	M

Req ID	Requirement	Description / Notes	Priority
FR-AUTH-06	Return to job after login	After successful login/registration, the candidate is returned directly to the application form for the job they intended to apply to (no re-navigation required).	M
FR-AUTH-07	Session/account persistence	A logged-in candidate can apply to multiple jobs and view their application history under 'My Applications' without re-entering bio-data each time.	S

6.4 Candidate Application Flow

Once logged in, the candidate proceeds through a guided, multi-step application form specific to the job requisition.

Req ID	Requirement	Description / Notes	Priority
FR-APP-01	Step 1 – Bio-Data	Capture candidate personal/bio-data details (see Section 9.1 for the full field list). Mandatory fields are validated before proceeding.	M
FR-APP-02	Step 2 – Education	Capture one or more education records (degree, institution, year, grade/score). Candidate can add multiple entries.	M
FR-APP-03	Step 3 – Work Experience	Capture one or more work experience records (employer, designation, duration, responsibilities). Candidate can add multiple entries or mark 'Fresher / No experience'.	M
FR-APP-04	Step 4 – Resume Upload	Candidate must upload a resume file (PDF/DOC/DOCX, max size as configured, e.g. 5 MB). The system must block submission if no resume is attached.	M
FR-APP-05	Optional cover note	Candidate may optionally add a short cover note/message for the recruiter.	C
FR-APP-06	Save & continue between steps	Candidate can move back and forth between steps without losing entered data before final submission.	S

Req ID	Requirement	Description / Notes	Priority
FR-APP-07	Consent capture	Candidate must accept a data-accuracy declaration and the Privacy Policy/Terms before the Submit action is enabled.	M
FR-APP-08	Final submission	On clicking ‘Submit Application’, the system validates all mandatory fields and the resume attachment, then creates the application record linked to the job requisition and candidate profile.	M
FR-APP-09	Confirmation page	On successful submission, the candidate sees a confirmation screen with an Application ID, submitted date/time, and status, and receives a confirmation email.	M
FR-APP-10	Prevent duplicate applications	The system should prevent (or warn on) a candidate submitting more than one application to the same open requisition.	S
FR-APP-11	My Applications view	Logged-in candidates can view a list of jobs they have applied to along with current status.	S

6.5 Notifications

Req ID	Requirement	Description / Notes	Priority
FR-NOTIF-01	Admin notification on new application	The System Admin is notified (in-app notification and/or email) immediately when a candidate submits a new application, referencing the job requisition and candidate name.	M
FR-NOTIF-02	Candidate confirmation notification	The candidate receives an email confirmation upon successful application submission.	M
FR-NOTIF-03	Status change notification (future-ready)	The system should be designed to optionally notify a candidate when the Admin changes their application status (e.g., Shortlisted, Rejected).	S
FR-NOTIF-04	In-app notification bell (Admin)	The Admin console displays an unread-count indicator for new applications not yet reviewed.	S

6.6 Admin — Application Review Grid

Req ID	Requirement	Description / Notes	Priority
FR-ADM-01	Applications grid per requisition	For any selected job requisition, the Admin can view a grid listing all candidates who applied, including Candidate Name, Applied On date, Experience, Location, Resume link, and Status.	M
FR-ADM-02	Resume access from grid	Admin can click 'View' against any row to open/download that candidate's resume directly.	M
FR-ADM-03	Search & filter applications	Admin can search the grid by candidate name/email and filter by application status.	S
FR-ADM-04	Update application status	Admin can update a candidate's application status (e.g., New, Reviewed, Shortlisted, Rejected) from the grid.	M
FR-ADM-05	Export applications	Admin can export the applications grid (with resume links) for a requisition to CSV/Excel.	S
FR-ADM-06	View full candidate application	Admin can click a candidate row to view the complete application — bio-data, education, experience, resume, and cover note.	M
FR-ADM-07	Cross-requisition applications view	Admin can view a consolidated list of all applications across all requisitions, not just one posting at a time.	S

7. End-to-End Process Flow

7.1 Requisition-to-Publish Flow (System Admin)

1. System Admin logs into the Admin Console.
2. Admin selects 'Create Job Requisition' and fills in job title, department, location, employment type, experience range, openings, hiring manager, and job description.
3. Admin chooses to 'Save as Draft' or 'Publish Requisition'.
4. On Publish, the requisition immediately becomes visible on the public career site without any candidate login required.
5. Admin can edit or close the requisition at any time from the Requisitions list.

7.2 Discovery-to-Application Flow (Candidate)

1. Visitor (anonymous) lands on the public career site and browses/searches published job requisitions — no login required.
2. Visitor opens a job detail page and reviews the description, requirements, and job overview.
3. Visitor clicks 'Share' to copy/share the job link (no login required), or clicks 'Apply' to proceed.
4. On 'Apply', if the visitor is not logged in, the system presents the Login / Create Account screen.
5. Visitor logs in or registers a new candidate account.
6. Upon successful authentication, the candidate is returned directly to the application form for the selected job.
7. Candidate completes Step 1 – Bio-Data.
8. Candidate completes Step 2 – Education (one or more entries).
9. Candidate completes Step 3 – Work Experience (one or more entries, or marks as Fresher).
10. Candidate completes Step 4 – uploads a mandatory resume file, optionally adds a cover note, and accepts the consent declaration.
11. Candidate clicks 'Submit Application'. The system validates all mandatory data and the resume attachment.
12. On success, the application record is created and linked to the job requisition and candidate profile; the candidate sees a confirmation screen with an Application ID and receives a confirmation email.
13. The System Admin is notified automatically of the new application (in-app + email).

7.3 Application Review Flow (System Admin)

1. Admin receives a notification of a new application.
2. Admin opens the relevant job requisition and views the Applications grid listing all candidates who have applied, with resume links.
3. Admin reviews a candidate's full application (bio-data, education, experience, resume, cover note) by clicking into the row.
4. Admin updates the application status (e.g., Reviewed, Shortlisted, Rejected) as the hiring process progresses.
5. Admin may export the grid or download individual resumes for offline review or sharing with the hiring manager.

8. Page Mock-ups (Wireframes)

The wireframes below illustrate the intended layout and flow for each key screen. They are low-fidelity representations meant to align stakeholders on structure and content — not final visual design. Actual branding, colors, and detailed UI will be defined during the UI/UX design phase.

8.1 Admin — Create Job Requisition

Internal Admin Console screen used by the System Admin to create a new job requisition. Supports Save as Draft or Publish; published requisitions become immediately visible on the public career site.

The mockup shows a web browser window with the URL `admin.talentbridge.com/requisitions/new`. The page title is "Create Job Requisition" and the user is "Amit Verma (Admin)".

Save as Draft **Publish Requisition**

Published requisitions immediately appear on the public career site job listing page.

There are two more fields on this screen which are not displayed on mock up

1. Maximum Salary Budget
2. Hiring shall be completed by

Wireframe — 8.7 Admin — Create Job Requisition (indicative; final visual design to be produced in UI/UX prototyping phase)

8.2 Admin — Applications Grid (Per Job Posting)

Consolidated grid showing every application/resume submitted against a selected job requisition, with candidate name, applied date, experience, location, a direct resume link, and status. Admin can search, filter by status, update status inline, and export the grid.

The screenshot shows the TalentBridge Admin Console interface. The left sidebar contains navigation links: Dashboard, Requisitions, Applications (selected), Notifications, and Settings. The main content area is titled 'Applications — Senior Backend Engineer' and shows 'REQ-2026-00417 • 18 applications received'. Below the title is a search bar for candidate name/email, a status filter set to 'All', and an 'Export CSV' button. The main table displays a list of applications with columns: Candidate Name, Applied On, Experience, Location, Resume, Status, and Action. The table contains 8 rows of data. The Status column uses colored pills to represent the status: New (green), Reviewed (blue), Shortlisted (orange), and Rejected (red). The Action column contains a three-dot menu icon for each row.

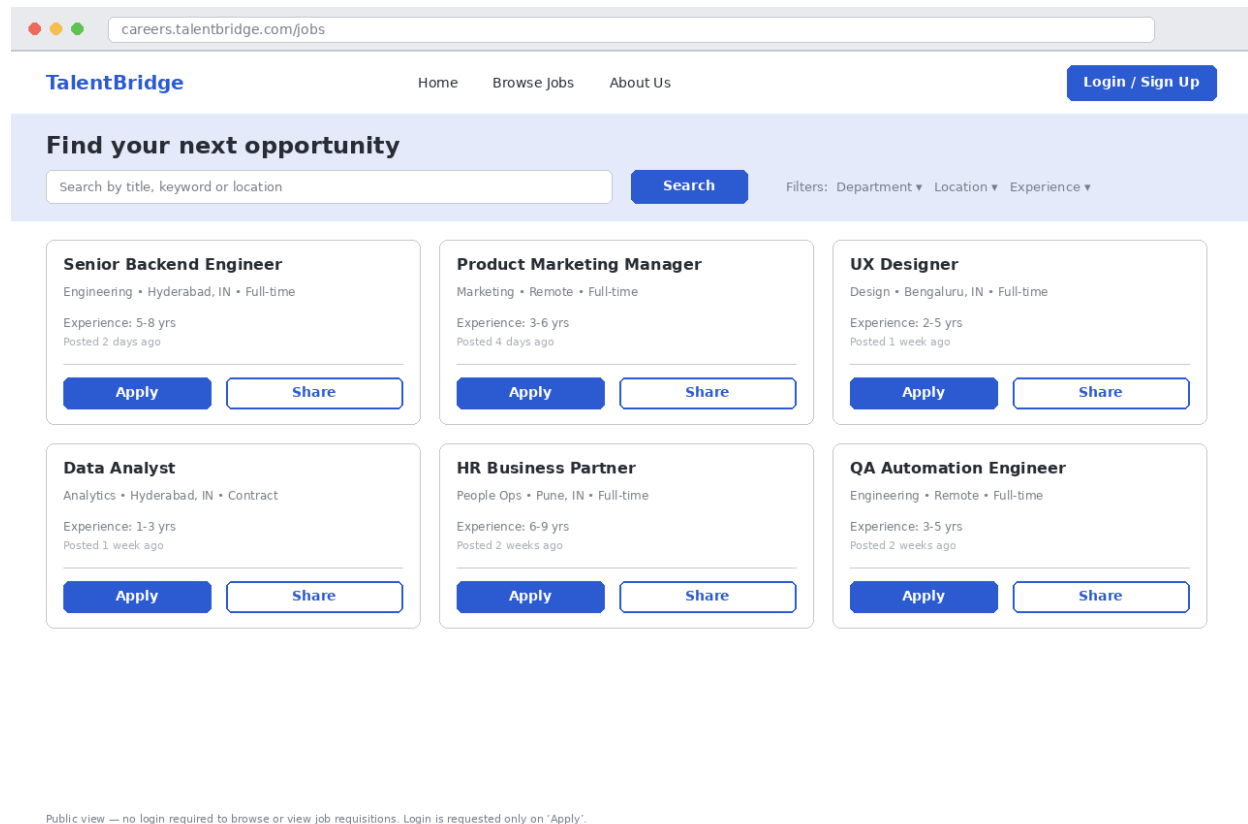

Candidate Name	Applied On	Experience	Location	Resume	Status	Action
Priya Sharma	15 Aug 2026	6 yrs	Hyderabad	View	New	...
Rahul Nair	14 Aug 2026	7 yrs	Bengaluru	View	Reviewed	...
Ananya Gupta	14 Aug 2026	5 yrs	Pune	View	Shortlisted	...
Vikram Rao	13 Aug 2026	8 yrs	Remote	View	New	...
Sneha Iyer	12 Aug 2026	4 yrs	Hyderabad	View	Rejected	...
Karan Mehta	12 Aug 2026	6 yrs	Chennai	View	Reviewed	...
Divya Menon	11 Aug 2026	5 yrs	Hyderabad	View	New	...
Arjun Das	10 Aug 2026	9 yrs	Remote	View	Shortlisted	...

Grid lists every candidate/resume submitted against this requisition; Resume column opens the file, Action offers shortlist/reject/download.

Wireframe — 8.8 Admin — Applications Grid (Per Job Posting) (indicative; final visual design to be produced in UI/UX prototyping phase)

8.3 Public Job Listing Page (No Login Required)

Landing page of the public career site. Displays a searchable, filterable grid of all published job requisitions. Each job card shows title, department, location, employment type, experience, posting date, and the Apply and Share buttons. No login is required to view this page.

Wireframe — 8.1 Public Job Listing Page (No Login Required) (indicative; final visual design to be produced in UI/UX prototyping phase)

8.4 Job Detail Page

Full detail view of a single job requisition, including description, responsibilities, requirements, and a job overview panel. Apply and Share actions are prominently placed both in the header and the right-rail call-to-action card. This page is also publicly accessible without login.

The wireframe shows a web browser window with the URL `careers.talentbridge.com/jobs/senior-backend-engineer`. The page header includes the TalentBridge logo, navigation links (Home, Browse Jobs, About Us), and a Login / Sign Up button. Below the header is a breadcrumb link: < Back to job listings.

The main job listing is for a **Senior Backend Engineer** position. It includes the following details:

- Engineering • Hyderabad, IN (Hybrid) • Full-time • 5-8 yrs experience
- Requisition ID: REQ-2026-00417 • Posted: 12 Aug 2026

There are two buttons: **Apply Now** and **Share**.

Job Description

We are looking for a Senior Backend Engineer to design and build scalable services powering our candidate sourcing platform. You will work closely with product and design to ship reliable, high-quality APIs.

Key Responsibilities

- Design and develop REST APIs for job posting and application workflows
- Own database schema for requisitions, applications and candidate profiles
- Collaborate with QA and DevOps for CI/CD and production reliability

Requirements

- 5+ years building backend services in Java / Node / Python
- Strong grasp of relational databases and REST API design
- Bachelor's degree in Computer Science or related field

Job Overview

Department: **Engineering**
Location: **Hyderabad, IN**
Job Type: **Full-time**
Experience: **5-8 years**
Openings: **2**

Ready to apply?
Sign in or create a free candidate account to continue.

Apply Now

Clicking Apply prompts login/registration before the application form is shown. Share copies a public shareable link.

Wireframe — 8.2 Job Detail Page (indicative; final visual design to be produced in UI/UX prototyping phase)

8.5 Login / Create Account (Triggered by Apply)

Shown when an unauthenticated visitor clicks Apply. The candidate can log in to an existing account or switch to Create Account. Social login (Google/LinkedIn) is offered as a convenience option. Login is mandatory before the application form is shown; browsing itself remains anonymous.

The image shows a web browser window with the URL `careers.talentbridge.com/jobs/senior-backend-engineer`. The page features the TalentBridge logo and navigation links for Home, Browse Jobs, and About Us. The main content area displays a 'Sign in to apply' form. The form includes a sub-header 'You need an account to apply for Senior Backend Engineer' and two links: 'Log In' (underlined) and 'Create Account'. Below these are input fields for 'Email Address *' (containing 'you@example.com') and 'Password *' (masked with dots). A 'Forgot password?' link is positioned to the right of the password field. A prominent blue 'Log In' button is centered below the inputs. Underneath the button is the text 'or continue with' flanked by two lines. Below this are two buttons for 'Google' and 'LinkedIn'. At the bottom of the form is a link: 'New here? Create an account to apply →'. A footer note at the bottom of the page states: 'Login/Registration is mandatory before the application form is accessible; job browsing itself remains anonymous.'

Wireframe — 8.3 Login / Create Account (Triggered by Apply) (indicative; final visual design to be produced in UI/UX prototyping phase)

8.6 Candidate Application Form — Step 1: Bio-Data

First step of the guided application flow, shown only after login. A step indicator at the top shows progress across Bio-Data, Education, Work Experience, and Resume & Submit. Mandatory fields are marked with an asterisk.

Step 1 of 4 — progresses to Education, Work Experience, then mandatory Resume upload before final submit.

Wireframe — 8.4 Candidate Application Form — Step 1: Bio-Data (indicative; final visual design to be produced in UI/UX prototyping phase)

8.7 Candidate Application Form — Step 4: Resume Upload & Submit

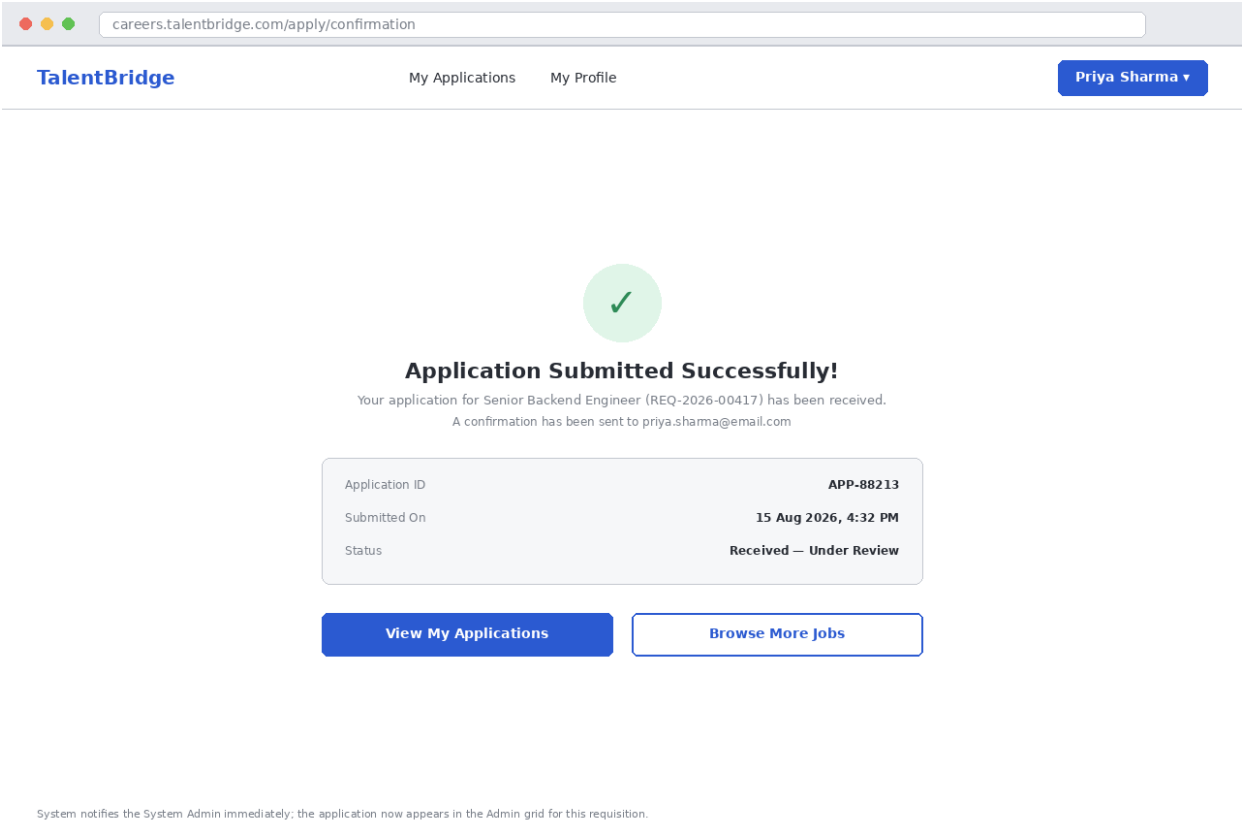

Final step of the application flow. Resume upload is mandatory (PDF/DOC/DOCX) and the Submit Application button is only enabled once a resume is attached and consent checkboxes are accepted. An optional cover note can be added.

The screenshot shows a web browser window with the URL `careers.talentbridge.com/apply/REQ-2026-00417`. The page header includes the TalentBridge logo, navigation links for "My Applications" and "My Profile", and a user profile button for "Priya Sharma". The main heading is "Apply: Senior Backend Engineer". Below this is a progress bar with four steps: "Bio-Data", "Education", "Work Experience", and "Resume & Submit" (the current step, indicated by a blue circle with the number 4). The "Resume Upload" section features a large light blue box with an upward arrow and the text "Drag & drop your resume here, or click to browse". Below this box, a file named "Priya_Sharma_Resume.pdf" (482 KB) is shown as successfully uploaded, with a "Remove" link. A "Cover Note (optional)" section contains a text area with the placeholder "Add a short note for the recruiter...". Below the text area are two checkboxes: "I confirm the details provided are accurate to the best of my knowledge." and "I agree to the Privacy Policy and Terms of Use.", both of which are checked. At the bottom right, there are two buttons: "Back" and "Submit Application". A small note at the bottom left states: "Submit is disabled until a resume file is attached. On success, candidate and system admin are both notified."

Wireframe — 8.5 Candidate Application Form — Step 4: Resume Upload & Submit (indicative; final visual design to be produced in UI/UX prototyping phase)

8.8 Application Confirmation Page

Shown immediately after successful submission. Displays the Application ID, submission timestamp, and current status, with quick links to view all of the candidate's applications or browse more jobs. The System Admin is notified in the background at this point.

Wireframe — 8.6 Application Confirmation Page (indicative; final visual design to be produced in UI/UX prototyping phase)

9. Data Requirements

The following field-level specifications define the minimum data captured at each step of the candidate application flow, and for job requisitions.

9.1 Candidate Bio-Data

Field	Type	Mandatory	Notes / Validation
First Name	Text	Yes	Max 50 characters
Last Name	Text	Yes	Max 50 characters
Gender	Dropdown	No	Male / Female / Other / Prefer not to say
Email Address	Email	Yes	Used as login ID; must be unique and verified
Mobile Number	Text/Number	Yes	Valid phone format with country code
Date of Birth	Date	No	Used for eligibility checks where applicable
Current Location	Text	Yes	City, State/Country

Field	Type	Mandatory	Notes / Validation
Current Company	Text	No	Optional if candidate is a fresher
Notice Period	Dropdown	No	Immediate / 15 days / 30 days / 60 days / 90+ days
Current Address	Text (multi-line)	No	Street, City, State, PIN/ZIP
Profile Photo	Image Upload	No	Optional; JPG/PNG, max 2 MB

9.2 Education Details (Repeatable Section)

Candidate can add one or more education records.

Field	Type	Mandatory	Notes / Validation
Degree / Qualification	Text/Dropdown	Yes	e.g., B.Tech, MBA, M.Sc.
Specialization	Text	No	e.g., Computer Science
Institution / University	Text	Yes	
Year of Passing	Year	Yes	Valid 4-digit year, not in the future
Grade / Percentage / CGPA	Text/Number	No	
Education Level	Dropdown	Yes	High School / Diploma / Bachelor's / Master's / Doctorate

9.3 Work Experience Details (Repeatable Section)

Candidate can add one or more work experience records, or mark themselves as a Fresher (no experience).

Field	Type	Mandatory	Notes / Validation
Employer / Company Name	Text	Conditional	Mandatory unless 'Fresher' is selected
Job Title / Designation	Text	Conditional	Mandatory unless 'Fresher' is selected
Start Date	Date	Conditional	
End Date	Date	Conditional	Disabled/hidden if 'Currently working here' is checked
Currently Working Here	Checkbox	No	
Key Responsibilities	Text (multi-line)	No	Max ~1000 characters
Total Years of Experience	Auto-calculated	Yes	Derived from experience entries; used for filtering in Admin grid

9.4 Resume & Attachments

Field	Type	Mandatory	Notes / Validation
Resume File	File Upload	Yes	PDF, DOC, or DOCX; recommended max size 5 MB; submission blocked without this file
Cover Note	Text (multi-line)	No	Max ~500 words; optional message to recruiter
Consent – Data Accuracy	Checkbox	Yes	Must be checked to enable Submit
Consent – Privacy Policy	Checkbox	Yes	Must be checked to enable Submit

9.5 Job Requisition

Field	Type	Mandatory	Notes / Validation
Job Title	Text	Yes	Max 100 characters
Requisition ID	Auto-generated	Yes	System-generated unique identifier, e.g., REQ-2026-00417
Department	Dropdown	Yes	
Location	Text/Dropdown	Yes	Supports 'Remote' as a location option
Employment Type	Dropdown	Yes	Full-time / Part-time / Contract / Internship
Experience Range	Text	Yes	e.g., 5-8 years
Number of Openings	Number	Yes	Positive integer
Hiring Manager	Dropdown/Text	Yes	Internal user reference
Job Description	Rich Text	Yes	Responsibilities and requirements
Status	System Value	Yes	Draft / Published / Closed
Posted Date	Date (auto)	Yes	Set automatically on Publish

11. Key Acceptance Criteria

11.1 Job Posting Visibility

- Given a requisition is published, when an anonymous visitor navigates to the career site, then the requisition appears in the public job listing without requiring login.
- Given a requisition is in Draft or Closed status, when an anonymous visitor browses the career site, then the requisition does NOT appear in the public listing.

11.2 Apply Requires Login

- Given a visitor is not logged in, when they click Apply on a job posting, then they are presented with the Login/Create Account screen and are not shown the application form.
- Given a candidate successfully logs in or registers from the Apply flow, when authentication completes, then they are taken directly to the application form for the job they clicked Apply on.

11.3 Mandatory Resume

- Given a candidate has completed Bio-Data, Education, and Work Experience, when they attempt to Submit without attaching a resume, then the system blocks submission and displays a validation message.
- Given a candidate attaches a valid resume file (PDF/DOC/DOCX within size limit), when they click Submit, then the application is accepted and a confirmation is shown.

11.4 Admin Notification

- Given a candidate successfully submits an application, when the submission completes, then the System Admin receives a notification (in-app and/or email) referencing the requisition and candidate.

11.5 Admin Applications Grid

- Given one or more candidates have applied to a requisition, when the Admin opens that requisition's Applications view, then all submitted applications appear in a grid with a working link to each resume.
